

**Healthwatch North Yorkshire:
Rural Access Project Report**

About Us

Healthwatch North Yorkshire is here to help local people get the best out of their local health and care services by bringing their voice to those who plan and deliver services across North Yorkshire.

Summary

Why We Did It.

As part of our process to identify priorities for 2016-2017 Healthwatch North Yorkshire spoke to a number of key stakeholders in the Airedale, Wharfedale and Craven area., As a result of these conversations the strategic board decided to include issues of Rural Access to health services as part of our work plan for 2016/2017 due to an increased number of issues raised by the public regarding missed appointments and limited access to Healthcare services throughout the Craven District due to its rural locality. This included qualitative information that vulnerable residents were forced to pay for overnight accommodation to enable them to access key appointments

What we did.

Healthwatch North Yorkshire conducted extensive research with the aim of addressing apparent issues with limited access to rural transport links and the resulting decreased access to local healthcare services and the issue of missed appointments throughout the Craven district. Working with Craven CVS we collected public experience data to influence service providers and promote best practice, putting emphasis on local solutions and peer support - building a framework of information to improve the effectiveness and efficiency in access to local healthcare service providers when providing care and distributing appointments.

Where did we do it?

 We worked on an initial focus area of the Craven district – looking at issues of rural transport links and access to appointments. While the issue had been raised in this specific area and resources limited an ability to conduct the research across the entire North Yorkshire footprint we are aware that this information could be replicated in any of the other districts in the county all of which have equal issues with rurality and isolation. It is also apparent that the lessons learnt and key recommendations will be equally applicable to all CCGs that we work with.

When did the project take place?

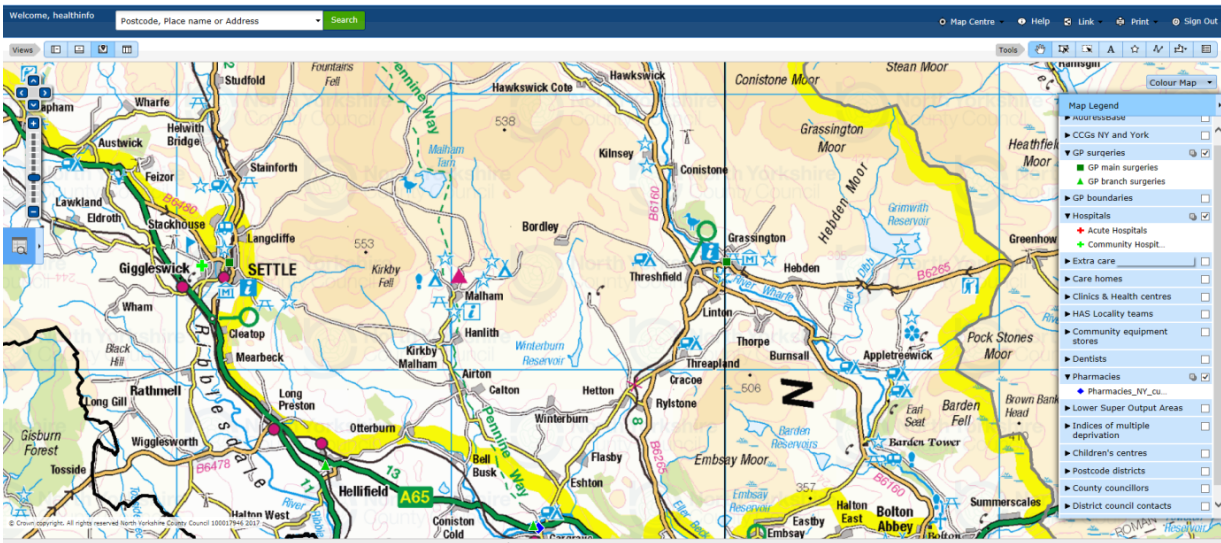

The work project began in May of 2016 with research into quantitative and qualitative data and local intelligence – following through to May 2017.

Who will benefit?

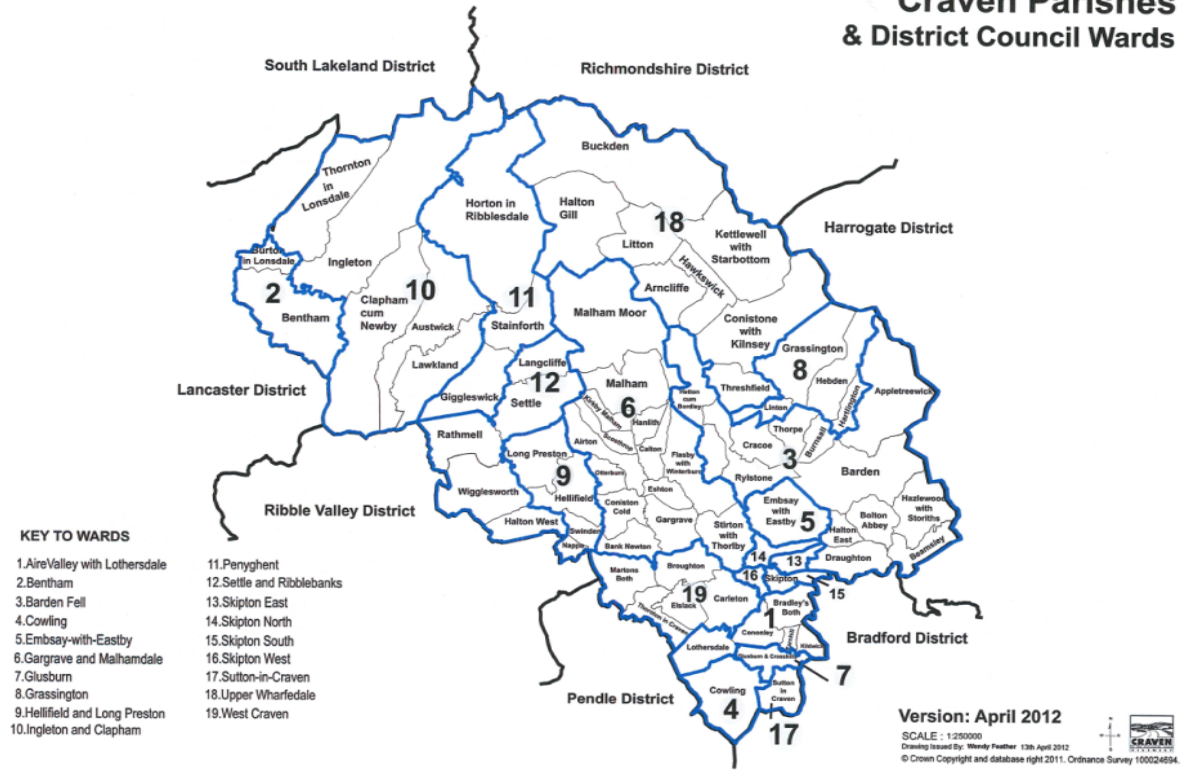

Healthcare and public transport service users situated throughout the Craven district of North Yorkshire will be able to access the timetables, in order to efficiently and easily plan necessary journeys to service providers. As previously mentioned with adequate resource this methodology could be replicated for other CCG areas and the key recommendations are of equal value to all commissioners in the county who with varying degrees have the same issues of large proportion of residents in isolated rural locations.

How did we do it?

Using a combination of both staff and volunteer time, Healthwatch North Yorkshire collected a wealth of data surrounding access to transport links and healthcare services (**GP Surgeries, Pharmacies and Hospitals**) throughout the Craven area. The initial project scope included dentist services however there were inadequate resources to enable us to complete this strand of research.

[View on Map](#)

We considered what public transport links were available throughout the Craven district to link residents to local Healthcare providers. We were then able to transpose our findings into a series of timetables. We first considered the earliest possible transport links – working towards an appointment window commencing from 9am onwards. We then cross referenced this with the latest possible departure times.

This was then followed by a series of checks to ensure each link would coincide with the available appointment window of the healthcare provider. Any supplementary notes were added as and when necessary - for example that someone might have to walk for 10 minutes to get to a service, once they've arrived by bus or train.

Table 1. Example of timetable created (see Annex A for further details)

TABLE TO DISPLAY MEANS FOR SAME-DAY TRAVEL TO HEALTH CARE SERVICES FROM LOCALITIES WITHIN CRAVEN

INFO / KEY;

This research covers Monday – Friday (excluding bank holidays) only.
Supplementary notes will be provided if further information is required.

- ED: Earliest departure and arrival time. Working to 9am appointments onwards.
- LD: Latest departure and arrival time. To allow enough time for appointment and accessing journey home.
- LR: Last return departure and arrival home time.
- AW: Appointment window. Appointments must start no earlier, and finish no later, than the allotted times.
- TAX: Taxi fare + travel time for routes not covered by public transport.

Key Findings

The 'pinch points' came where access is very limited in those areas which are well and truly out in "the countryside" as well as linking areas to slightly further out services, which people will sometimes have to go to.

Some routes were outright rejected due to being at an unsuitable hour (as a rule, beginning before 6:30 - clearly unfair on the service user) or too complicated to expect the patient to follow.

This is widely due to bizarre bus schedules. One example of this would be for any patient attempting to get a bus from Burton to Bentham and then a train to Skipton (a perfectly reasonable route which arrives at 8:21) if they misses this route by around a minute, and would otherwise have to settle for arriving at 12:10.

If the patient can reach the destination for under two hours in a given day, an alternative starting point is given, with a taxi fare and time given. If a taxi fare and time is given for a parish in some columns of the timetable but not others e.g. *Appletreewick*, this is because the destination is unable to be reached and then returned from in a given day. **Some parishes have no bus services, and therefore always have a taxi option.**

If this does reach hospitals and GP surgeries in the area, these times will look overly restrictive. It is vital that they know that this merely shows the truth: **there is no way a patient can be there without further taxis or an overnight stay outside of these hours if using public transport.**

Other areas were easier to navigate – with better transport links which made appointment windows far more flexible. As a general rule, those areas with easy access to a train station, such as Bentham, were far more accessible than those who had to rely entirely on bus services.

The following tables show each service location and the wards grouped by available appointment windows

Table 2 - Hospitals

	No window	Less than one hour	1-2 hours	2-4 hours	over 4 hours
Airedale General		10	2	8	47
Burneley General		2		15	50
Castleberg		1		14	52
Harrogate				24	43
Royal Lancaster Infirmary		1	8	1	57
Lynfield Mount	1			10	56
Skipton General			1	8	58
Wharfedale		1	2	9	55

One of the key areas for concern in terms of hospitals must be Upper Wharfedale. The only reasonable window over 4 hours for access to a hospital is the Royal Lancaster. While this does provide potential for appointments between 10.35am and 3.45 pm even this would require a 12 hour round trip leaving at 7am in the morning. All other hospitals were only accessible within a 2-4 hour window. It should also be of interest to commissioners that for wards in this area it seems apparent that, via public transport at least, facilities such as the Royal Lancaster that are geographically further away are more easily accessible than those such as Skipton and Castleberg which may appear closer.

Table 3 GP Surgeries

	No window	Less than one hour	1-2 hours	2-4 hours	over 4 hours
Bentham Medical Practice Bentham				2	65
Bentham Medical Practice - Ingleton				20	47
Cross Hills		1	1	11	54
Dyneley House			1	10	56
Fisher - Gargrave		1		12	54
Fisher - Skipton			1	10	56
Grassington		4		3	60
Town Head Hellifield		1		16	50
Town Head Settle		1		16	50

While it should be noted that GP surgeries are far more accessible than most hospitals this does hide some significant issues. Areas such as Barden Fell for example who do have available windows of over four hours in effect only have the opportunity to access the GP between approximately 10.30am and 3pm. Also other areas such as Embsay and Upper Wharfedale who appear to have good provision throughout the day are heavily reliant on single GP practices. If these practices were to close either temporarily or permanently then residents in these areas would likely be looking at appointment windows well below the four hour threshold. It does also raise questions about limited patient choice which is a fundamental principle of the NHS constitution.

Another significant and highly topical issue that should be flagged is that of extended GP access. Over two thirds of the wards within this region have no public transport access to a GP surgery outside of normal office hours. For these residents the possibility of access to GPs from 5pm to 8pm would be of no realistic benefit.

Table 4 - Pharmacies

	No window	Less than one hour	1-2 hours	2-4 hours	over 4 hours
Boots Skipton				15	52
Coop Bentham				13	54
Cowling					
INgleton				25	42
Lloyds Skipton				7	60
Moss Cross Hills		1	1	10	57
Moss Settle		2		16	49
Moss Grassington		2		5	60
Naylor's Gargrave		1		19	47
Sutton in Craven					
Tesco Skipton		2		13	52

Due to resource issues it was not possible to fully complete the pharmacy analysis but it still provides very interesting trend data that mirrors in most ways the pattern of access to GP surgeries.

Key Recommendations

Due to the rurality of locations within the Craven district, limitations to available appointment windows are a common issue. Given that many residents struggle to make their appointment times; it would be beneficial for Health Service providers to account for the service users living in these locations.

One option would be to assess accessibility, transport options and favoured time slots when the patient is making the appointment. This would be beneficial both to the service user, and to the Health Care Provider - given that it would help to reduce the number of missed and cancelled appointments. It is worth exploring whether current NHS systems can flag patients within specific locations with their available transport window and include a note on the system that would assist professionals in choosing an achievable appointment.

A further recommendation, which is relevant to recent research and changes produced by NHS England, is the option of **extended GP opening hours**, with surgeries being open later on weekdays and some opening their doors over the weekends.

A recent survey conducted by NHS England shows the most common days for extended GP surgery opening hours were on Monday, with the least common being on a Sunday:

'Extended access is the offer, to registered patients of a practice, of pre-bookable appointments outside of core contractual hours, either in the early morning, evening or at weekends....Sunday is the least common day for practices to offer extended access either through their group or practice; whilst Monday is the most frequent day on which practices offer extended access...'

<https://www.england.nhs.uk/statistics/wp-content/uploads/sites/2/2016/12/GP-Extended-Access-Commentary-March-2017-v1.0-Final.pdf>

The extension of opening hours would be beneficial to service users throughout the rural Craven district due to limited public transport links – however, weekend services, especially those offered on a Sunday would be less beneficial as transport links are even scarcer on non-week days.

This has already been seen in some 'Satellite Surgeries' across the country; an example being Sheffield, with 4 satellite units across the city that offer 'out of hours' access to GP surgeries, which are all 'served by public transport routes and are fully accessible.. .'. .

http://www.thecrookespractice.co.uk/sites/default/files/kcfinder/PCS_Satellite_leaflet_4pp_web.pdf

One of the most noticeable conclusions drawn from the research was key gaps in transport links and services not being conveniently located. Wherein the calculated route was either far too complicated to follow or there were only links available for a certain part of the journey. A recommended solution to this issue could be **community transport links** - assisting residents to attend medical and other appointments when, ostensibly, other forms of public, private and commercial transport are unavailable or inappropriate.

An example of this kind of service is available from **Age UK**, who offers volunteer driven community transport, running schemes from both Settle and Bentham. Anybody registered with the charity, over the age of 55, can access either free or affordable (charged at a basic mileage rate) door to door transport, taking service users to and from appointments throughout the district.

TABLE TO DISPLAY MEANS FOR SAME-DAY TRAVEL TO HEALTH CARE SERVICES FROM LOCALITIES WITHIN CRAVEN

INFO / KEY:

This research covers Monday – Friday (excluding bank holidays) only.
Supplementary notes will be provided if further information is required.

ED: Earliest **departure** and **arrival** time. Working to 9am appointments onwards.

LD: Latest departure and **arrival** time. To allow enough time for appointment and accessing journey home.

LR: Last **return departure** and **arrival home** time.

AW: **Appointment window.** Appointments must start no earlier, and finish no later, than the allotted times.

TAX: Taxi fare + travel time for routes **not covered** by public transport.

TABLE TO DISPLAY MEANS FOR SAME-DAY TRAVEL TO HEALTH CARE SERVICES FROM LOCALITIES WITHIN CRAVEN

INFO / KEY:

This research covers Monday – Friday (excluding bank holidays) only.
Supplementary notes will be provided if further information is required.

ED: Earliest departure and arrival time. Working to 9am appointments onwards.

LD: Latest departure and arrival time. To allow enough time for appointment and accessing journey home.

LR: Last return departure and arrival home time.

AW: Appointment window. Appointments must start no earlier, and finish no later, than the allotted times.

TAXI: Taxi fare + travel time for routes **not covered** by public transport.

Craven Transport Stories – Research conducted by Craven CVS

1 Malham

I live in Malham and the public transport system is not good. I have three teenagers/young adults and only one has passed their driving test (but does not own a car). Since they are no longer allowed to get on the school bus (8am to Skipton 4pm return) there is only one bus a day into Skipton. The bus leaves at 10.13am and returns at 1.30pm. This means young people who don't drive are stuck in the village – none of them could work outside the village and live at home so yet again the situation forces our young people to move away.

2 Craven

Public transport in Craven is very poor, and also expensive for those who do not have a bus pass.

3 Bentham/Settle

There is no bus link between Bentham and Settle, this has been a long term situation and prevents the two communities working together in providing services for people who do not have their own transport.

4 Bentham/Settle

There is no train link between Settle and Bentham as they are on separate railway lines. If you want to go to either you need to use Giggleswick station which is 2 miles from Settle, on unpaved, unlit roads and across the busy A65.

5 Settle – Kirkby Lonsdale

Buses stop early evening North of Skipton so young people particularly are unable to travel at this time. There are two hour gaps in the afternoons.

<http://getdown.org.uk/bus/bus/581.shtml>

6 Settle

Train services from Settle to Leeds are limited and mainly only run every three hours, starting at 7.28am. The last train from Leeds to Settle is 19.19pm.

7 Villages around Settle

Those without their own transport in outlying villages around Settle are isolated as there is virtually no service.

8 Settle

The bus service that runs is adequate for travelling to Skipton for a shopping trip, but not user friendly if you have to be somewhere at a certain time for an appointment.

9 Settle and surrounding villages

It is not possible to take advantage of evening courses at Craven College if you do not have your own transport.

10 Burton in Lonsdale

I rely on the bus service to get to Bentham and Lancaster, however, if it is a rainy morning I get wet before the hour long journey to Lancaster because there is NO BUS SHELTER for that direction. Going to Ingleton, where I seldom go, we can use the Village Shop's canopy. There are not enough buses from Lancaster to Burton-in-Lonsdale in the afternoon. If I miss the 12.15pm bus there are no more until 4.15pm, too long a gap, especially in Winter. Please consider us pensioners who use the service, and bear in mind that it is particularly bad for our health to sit in wet clothing for an hour and to be damp the whole time we are visiting Lancaster.

11 1.5 miles outside Austwick

I can get a bus at 2 hourly intervals, during the day into Settle and back, my most regular journey. It's not possible for me to travel by bus to Bentham, another regularly journey. For this route, I can cycle/walk to Clapham station (4.5 miles) and then on to Bentham by train - though not ideal in bad weather! Buses do run Austwick to Clapham but not at times that make a connection at Clapham station, a mile away.

12 1.5 miles outside Austwick

Both the bus (580 or 11 services) and train services that are provided, generally run to time and are reliable.

13 1.5 miles outside Austwick

Frequency of service is fine for the daytime travel I do, but none existent from mid-evening. For trains this is after 8.30pm, for example, necessitating travel to Skipton to catch later trains from Leeds and for other journeys, use of a car

14 1.5 miles outside Austwick

The first train service to Lancaster is 6.07am, then 9.20am, which for me is a bit of 'waste' of a service, in that I don't generally need to travel that early.

15 1.5 miles outside Austwick

Integrated transport - isn't! I use train services from Settle to Leeds and from Giggleswick/Clapham to Bentham and Lancaster. The former has 3 bus services a day, each way. 1 train departing Settle can be used, after some waiting around e.g. arrival into Settle at 9.15am, train south at 10.30am. For the latter although there is a bus service which could in theory co-ordinate with trains, this doesn't happen for arrival/depart from Clapham station, which is a good mile from the village bus stop. Only some buses give co-ordination at Giggleswick, into Settle a mile away.

16 1.5 miles outside Austwick

The Dales Rail Card is a helpful support to the cost of train travel.

17 Glusburn

We have doubled our numbers at the luncheon club as a result of a sponsor offering free transport. Not only are these activities essential for the well being of older people who don't have their own transport but if they have to pay for the little Red Bus/ NYCC bus on top of the charge for the activity, they give it up as too expensive. (in our case the meal is £4.50 if you add another £4 for transport many regarded this as too expensive). This then has a domino effect in that if numbers are low the activity will not be viable which is where we were at the beginning of the year There is a desperate need for free transport for those without a car who are over 70 and/or disabled to take them to a

range of community activities. Taxi vouchers should be considered for this group.

18 Glusburn

It is crazy having an NYCC bus collect from a village or road & be half full when others living nearby will miss the activity because they regard the £2 fare each way as too expensive to go. That has been our experience & the savings made by NYCC must be minimal.

19 Bentham

I had a fun time coming back from Leeds to Bentham when I found I had to get a bus from Leeds to Shipley, then another from Shipley to Skipton. (I had no idea what was going on!) Luckily I met a woman who told me her very interesting life story, but the experience was less good for her than for me, as she was quite severely disabled, & the getting on & off all those buses & trains was pretty taxing. It was worse when my son turned up at the station in Leeds for a time-tabled train only to find it wasn't running & there was no resource but to go to Preston, whither my husband drove to pick him up at great cost in environmental damage & temper. Yes! we do need better bus & train services!

20 Settle

I myself had to attend Airedale Hospital for a 12.00 appointment and could not go by car, my usual transport. I set off on foot from my house at 10.00 to catch the 10:30 train. It took me 20 minutes to walk from Silsden station (had to change at Skipton) to arrive exactly at 12.00 at Airedale. This 2 hour, 22 mile journey would normally take me 40 minutes by car. Patients who cannot walk could not manage this journey.

21 Settle/ Giggleswick

An elderly gentleman (96 years of age I believe) lives at the bottom of our street. He can walk but is partially sighted. He used to travel from Giggleswick to Settle on the bus regularly to visit the doctors, the supermarket, the bank and the church for a meal during the week. He also went to Skipton Auction

Mart to meet his old friends as he is a retired farmer. Since the curtailment of the Pennine bus service, the new bus operators will not send their buses via Giggleswick with the result the old gentleman has to rely on neighbours for lifts on every occasion. His relatives do not live nearby so this also presents a problem. I hope this is a suitable example of the poor transport links in Craven.

22 Nr Bentham

I live about 2 miles from Bentham. For my work I need to travel to Bristol 3 times a year and Cardiff usually once. For this I often have to catch a train from Bentham at 6:21 - which gets me to my destination much too early, or I would miss the start of my meeting if I took the later service, around 9am I think. It's not convenient at all but I have managed for over 10 years with this. However, what's really annoying is trying to get back to Bentham. The connections from Lancaster are so few and far between that I usually end up asking my husband to drive the 15 miles to Lancaster to collect me. It's disappointing when the railway line is there, I want to use it, but the services just aren't there at sufficiently regular

intervals. From time to time I also travel from Bentham to Beverley in East Yorkshire. I am intending to do so quite soon again and looked up the price of tickets. If I travel from Clapham, it will cost me almost £20 less than getting on at Bentham! £36 as opposed to £54. The price difference is stupid! There is no incentive in using my nearest station (Bentham) so I chose to use my car more, despite wanting to make use of public transport where I can.

23 North Craven

I recently went to the Rugby World Cup at Elland Road in Leeds, choosing to travel by train which seemed the most convenient means of travel. The train from Carlisle to Leeds was very busy, with many people having to stand up for their entire journey, but relatively comfortable. The journey home was something of a contrast. To say that the train was over-crowded would be a huge understatement. Whether the train should have been allowed to leave Leeds on the grounds of safety is questionable, but being the last train of the day beyond Skipton to the North, there was no alternative. Many young families and several disabled people were on board, fighting for room; it was simply impossible to find any space. Northern Rail must have known that with

a crowd upwards of 35,000 at Elland Road, plus the regular Sunday afternoon travellers, the normal sized train would be inadequate, and that many people would be left stranded, unable to get into the already full carriages. Last July, when the Tour de France was passing through the area, many travellers were similarly let down by Northern Rail. Trains to Leeds were overflowing with people before they got to Settle and beyond, and many just gave up and went home. Settle has been chosen as a host for either a start or finish for next year's Tour de Yorkshire. Will Northern Rail cope with the many thousands of spectators? Or will they too be left behind? North Craven is let down by Northern Rail. The last trains to Carlisle at weekends leave Leeds far too early, yet Skipton gets several trains an hour up to 11.30pm. Travellers beyond Skipton on Sundays have to cut their day short or face an expensive taxi ride. Could Northern Rail not simply add a train from Skipton up the line later in the evening, perhaps on weekends to bring North Craven and beyond into the 21st century?

24 Low Bentham

As far as I'm concerned there is not, and has never been in the over 30 years I've lived here, any public transport of any use. I'm told the train journey to Lancaster is scenic if one has time and money to spare and don't mind setting off back nearly before one arrives. Buses do apparently run once in a while at

Transport Stories Craven CVS December 2015 Page 5

odd times, designed to suit no one I know, and one can wait for them for ages without the benefits of any shelter.

25 Burton in Lonsdale

My comment is about the buses in the village here. It seems Kirkby Lonsdale can have buses until 11pm, but ours stop at 6pm. I know they are in Lancs and Cumbria, but small villages (including Ingleton) are being sidelined. A 10 minute ride to Bentham or Ingleton is half the price of a 40 minute ride to Lancaster, which is too much. 25 Years ago I wrote a paper about a transport system for the area, where mini-buses collected people to take them to main roads where buses could be more frequent, likewise buses to meet train times at rural stations.

26 Skipton

I regularly get the 66 Keighley and District bus from Steeton to Skipton and vice versa. Since the end of August an extra bus has been put on each hour which means there is now on every 20 minutes. This has made a really positive change to a route which was very overcrowded and uncomfortable. It is especially noticeable at peak times and now makes the bus journeys seem much less of an ordeal. This is a very positive move in my opinion.

27 Embsay

Embsay residents have told me they are very happy about now having a bus service on a Saturday which means they no longer feel like 'prisoners' in their own village.

28 Cononley

Some anecdotes based on the experiences of my wife and I, and our knowledge of the way in which several, mostly elderly, people in Cononley use public transport. None of us own a car. First of all we are fortunate in having an excellent and well used rail service. Some 'over 65' former bus users have taken to using the train despite the fact that much longer walks are involved and the fact that they cannot travel free.

29 Cononley

However we are all dependant on the few buses if we need to go to Cross Hills, Sutton or Airedale Hospital (though my next appointment there is too early for the bus and I will travel by train to Steeton then walk the mile to the hospital).

30 Cononley

The infrequent buses make for awkward return journeys or enforced waits in Skipton. I know one elderly lady who takes the first bus to Cross Hills in order to change buses and arrive 1/2 hour earlier in Skipton.

31 Cononley

My wife and I were put off the bus by being turned away from an overfill bus on a couple of occasions.

32 Cononley/North Yorks wide

In a wider context buses provide poor options for more adventurous shopping and leisure travel. Poor connections are offered by infrequent buses. The Saturday service to Harrogate is better than nothing but it is indicative of the

Transport Stories Craven CVS December 2015 Page 6

dismal state of North Yorkshire public transport that reasonably timed return journeys to Harrogate allowing a full day there cannot be made on any day. I encourage people to travel into Lancashire and visit Clitheroe instead!

33 Cononley/North Yorks wide

It is not just the elderly who are disadvantaged by poor public transport - many teenagers and people in their 20s are seen to depend on them too.

Incidentally no elderly person I know is interested in demand responsive or other fashionable, but desperate, alternatives to reliable regular public transport.

34 Carleton –

Not an ideal service but better than none at all. A Saturday bus would be useful to link up with the bus to Harrogate but there is no bus from Skipton to Carleton to link up with the return bus from Harrogate.

35 Carleton –

We find the bus service adequate, but would like a Saturday service if possible.

36 Carleton –

At the moment I am never sure of the times of buses so haven't been using them.

37 Carleton –

For "never" interpret as "unlikely". (With regard to how often the bus would be used). Normally only use the car for shopping once a week for weekly grocery shop, otherwise use the bus whenever I go into Skipton. (May be a typo).

38 Carleton –

I used to bus or walk into Skipton at 2.25 and return at 3.15 or return at 4.15. When I walked for health I walked into Skipton and returned on the 3.15.

39 Carleton –

I rely on the buses to get into town as I can't walk far. I am very happy that the buses are running again, especially the new times as they now connect with other bus services to Lancashire/ Keighley.

40 Carleton –

I rarely use the bus as it is now totally inadequate. I have a son with learning difficulties who cannot drive so I am now a permanent taxi service for him to get to work in Skipton & home & for him to get into Skipton & back on a weekend. He is now moving into Skipton and one reason for this is due to lack of transport to & from the village.

41 Carleton –

Should my wife become unable to drive, I would have to use the bus in order to leave the village for whatever reason.

42 Carleton –

If the bus timetable was more appropriate I would use the bus even more often. At the moment, if I need to get a train to service was threatened with termination. Leeds, I almost always have to get to and from Skipton station by taxi, which is really expensive. Before the timetables were changed, I could use the bus on both legs of the journey.

43 Carleton –

I am a Practice Health Champion volunteer at Fisher Medical Practice. I help with a variety of events at the surgery, visiting the practice at least 3 times per week. I travel in my own car and pay for parking as the bus service is not frequent enough.

44 Carleton –

I love shopping in Skipton market on Saturday and would definitely use a Saturday bus service but without a bus pass, Carleton to Skipton and back seems very expensive.

45 Carleton

In the summer I usually go to/from Skipton (for shopping, visits to the library, or to catch a train or another bus) by bike, so I don't use the bus much. My bus usage increases in the winter because the weather and lack of daylight make it unpleasant/dangerous to go by bike. I would therefore use the Carleton-Skipton bus more in the winter and use an early/late service if available.

46 Carleton –

As a self employed person my work contracts and leisure time vary throughout the year- therefore it's very difficult to choose between 1-3 times a month and none, as neither would be true. I would catch the bus more often if it was a reasonable price (is it one of the most expensive 2 miles in the country to travel on public transport- I heard someone say between Ambleside and Windermere was the most expensive, but I think we are beating them!); and if you could catch a bus that would reasonably get you to and from a bus/train connection in Skipton to get elsewhere to work...

47 Carleton

We used to use the last Fri and Sat buses to Skipton (6.50?) so that we could go out for the evening. We would only use these once or twice a month normally.

48 Carleton

Bus times are not useful to anyone that has a job 9-5 and especially not if you work anywhere other than Skipton. They are also far too expensive considering it is only a mile or two drive, the cost is the same as from Skipton to Keighley or to Ilkley.

49 Carleton –.

Really miss the bus since the change. Now have to walk, take taxi or use car when absolutely essential. Parking difficult in Skipton town. Tried to be environmentally friendly and not use car but bus times not convenient for

connecting to Dales buses and others. Not convenient for early or late appointments for doctors, opticians, dentists and hospital. Used to organise days out by bus with friends but cannot do now due to connections. Not a good advert for an important tourist area.

50 Carleton –.

I regularly used the service before the timetable changes. My medical appointments are frequent and I should not drive. Sadly we are not having a bus service that serves everyone in the community of Carleton.

51 Carleton –.

I live with my daughter and her family. My grandchildren cannot get to Skipton without their parents help, when there is not a bus on a Saturday. This hinders their independence as one is 17yrs old and the other 10. At ten yrs old my grandchild would like to learn to be independent and travel to meet friends. It's part of growing up.

52 Carleton.

I liked having the Saturday bus as it meant I could catch the train to visit my family. Now there is no Saturday bus I can't see them since the Pennines bus stopped and I was very, very disappointed. We played indoor games with the deaf in Yorkshire and we were happy. Now we can't go because of there being no bus on Saturdays and are too bored with no Saturday bus round in Carleton village??? Annoyed.

53 Carleton.

A later bus at around 7pm would be good as then my daughter would be able to attend clubs in town. I really could do with buses on a Saturday.

54 Carleton –.

I am unsure regarding the capacity of the current buses (due to size and frequency) as I realise at key times they can be quite full. I have small children and a pram and there is no way I would risk being unable to return due to a full bus. So I wait until I can use a car to go into town.

55 Carleton.

The minibus seems sufficient during the day and is presumably more economical. A post 4pm bus from Skipton would enable me to get home from U3A afternoon classes which I cannot currently do. I love our bus and it is important to me now that medical issues prevent me from driving, and it gives me back a certain amount of independence.

56 Carleton.

The bus is a valuable asset for our village and many older people rely on it.

57 Carleton.

I have to walk to work every day seeing there's no work bus. Used the bus every day when there was an early morning work bus. I do not drive and I do not have access to a car.

58 Carleton.

We would be more likely to use the bus if it ran more frequently.

59 Carleton –

I share a car so tend to organise my trips to Skipton when I have access to that. The bus also used to be too expensive - but £3 return is better now.

60 Settle and surrounding villages.

North Craven is let down by Northern Rail. Settle has been crying out for a later train for many years, yet these cries continue to fall on deaf ears. After 7pm, there are no fewer than 14 trains from Skipton to Keighley (the last being at 10.17pm) and a staggering 18 trains servicing Skipton from Keighley during that same time frame (the last arriving at two minutes past midnight). Take a guess how many trains there are from Skipton to Settle after 7pm... one, leaving Skipton at 8pm! You can forget about catching the bus too... the last bus leaves Skipton at 5.45pm. Not only are the residents of Settle and its surrounding villages missing out with the absence of a late train but the residents of Skipton and beyond are missing out, too. Missing out on the fabulous pubs, restaurants, Victoria Hall theatre and other delights this beautiful town and its villages have to offer. Come on, Northern Rail, we're not asking the earth, just a fair deal.

61 Carleton.

I write you this letter on behalf of Miss Linda Parrington, Linda has been an employee of Whitaker's Chocolates Limited since 1989. During her 25 years' service she has been totally reliant on public transport. With the closure of the Pennine bus service Linda's only means of getting to and from Carleton has been on foot. In just a few short months Linda has clocked up around 300 miles, fortunately the weather has been favourable and the days have been long, summer will however soon be at an end and with that comes dark mornings and evenings and of course bad weather. Linda can put on clothing to protect her from the wind and rain, but for anyone who has walked from Skipton to Carleton they will know the amount of traffic has increased as has the speed at which they drive. The footpath is narrow with no street lighting, and is a dangerous road to walk along once it gets dark. I'm sure Linda isn't the only resident of Carleton that doesn't have access to their own personal transport or can afford to use taxis daily. Since the cessation of the regular bus service I feel sure this has caused hardship and a feeling of isolation to many elderly and vulnerable residents of Carleton.

62 Carleton –

Public meeting: We have now got a 16-seater mini bus that runs three times a day in the week and no service at all on weekends and bank holidays. Come September (2014) there will be one further 16-seater minibus provided at 8:25am and back at 3:55pm. These will however not take fare paying passengers, only children with free school passes (8 at that time) or children that have a pre-paid for annual pass. And demand is low – this is a service that doesn't connect with any forward transport links, it is expensive, it is infrequent! THAT IS WHY DEMAND IS LOW. Let's not confuse demand with usage. I maintain that this is a political policy, this is a choice, this is nothing to do with the economic climate or restrictions placed on them by central government. They chose this because this fits their political philosophy, their ethos. Their budget each year is £900 million, Cerleton could have a cheap efficient shuttle bus service 6 days a week for little over £40,000 a year. They choose not to do this. We could fund a bus service for the village that would be free for a fraction of the 4.3 million pounds they claim on travel expenses each year. NYCC pay out for 26,000 journeys that are less than the distance to

Skipton and back, a journey they now believe we should all walk, and that from September 75% of the school children should walk. It is a self fulfilling prophecy that as the service deteriorates we use it less, they then have a reason to cut it further. NYCC state that there is no demand for a bus service in the village. Surveys were carried out last week of March and first week of May.- all Pennine routes were surveyed – vast majority on Tuesdays and Thursdays (non-market days) and one was done when the teachers were on strike. This allows them to state that there is no demand for more services from Carleton. If you cut a service, let people know it is going, make the remaining service inconvenient, infrequent and expensive (it will be used less and cut further).

63 Carleton

This is the letter that came, I thought from NYCC, since it had their letter head and franking on the envelope, but apparently came via Skipton Girls' High. The Transport Officer just sent out messages to three Skipton secondary schools to let pupils from Carleton know there would be changes to the school bus service (service 12) and left it up to the schools to contact pupils. This seems to have been a bit hit and miss as not everyone has had a letter through the post. Also pupils starting secondary school in September have not been informed – but following a phone call from Duggie Speight (Carleton Primary School headmaster) this is now being done. There are eight free bus pass holders so there will be eight spaces up for grabs on a first come first served basis (already unfair since half the kids haven't even had a letter yet!). I can think of at least 20 kids who use the bus already, without thinking too hard – but they (NYCC) are adamant there are only enough funds for one 16-seater bus – bottom line!

64 Carleton

I write on behalf of Carleton residents who have expressed concerns regarding the current bus service. The frequency of this service is inadequate and the new timetable that started today is worse than it was previously. The buses are later now and arrive in Skipton 10 minutes after the hourly Leeds bus and the two hourly Settle bus have left – meaning very lengthy waits if travelling on these routes! (Edit: now a wait of 30 minutes for the Leeds bus but only 15 for

the Settle bus). The timetable also appears to have a mistake in the timing of the buses: (timetable inserted showing arrival in Carleton at 10.35). Surely this should be 10.40? There is now even more confusion in the village. We have also noticed that the Embsay buses are running on an hourly basis from 9am to 16.20, eight times a day, whilst we only get three buses a day! Edit: there are now 6 buses a day). This is a village a similar distance from Skipton. Why has this route been greatly improved and ours has not? Is it a case of, as rumoured, whoever shouts the loudest gets the best service? Carleton residents, particularly the elderly without their own transport, now have problems arranging doctors, hospital and other appointments as they have very restricted times that they can attend. They also feel trapped in the village, unable to visit friends and relatives or just to get a change of scenery or a trip to another town. This will be much worse for them in the winter months. It is important that elderly people can remain active and a decent bus service is vital. They also worry that the buses back to Carleton will be full and they won't get a seat. This is especially true if they catch it with their shopping bags at the stop outside Morrisons. I know of several who have resorted to taxis at £5 a journey just to be sure that they can get home safely and in reasonable time. These are people on pensions who can ill afford this extra cost. Others have resorted in going to Skipton in their cars, which is contrary to the need to reduce pollution and congestion. We have also heard that residents will no longer be able to use the earlier and later buses that are provided for the schoolchildren. How do workers without cars get to work? What about when the road is flooded by the Aire? You need to look at bus provision in our area and make improvements without delay.

65 Carleton -

The rescheduling of the new, meagre bus service between Carleton and Skipton has further added to my personal dismay. Has it escaped your notice that the residents of Carleton may wish to venture further than Skipton? The most recent alteration affects those of us who wish to travel on to Draughton, Addingham, Ilkley, Otley and Leeds. The through buses to Leeds depart from Skipton at a quarter to the hour. Now that the bus leaves Carleton at 20 minutes to the hour (edit: this has since been changed and it now leaves at 15 minutes past the hour, however there is still a 30 minute wait in Skipton for

the Leeds bus). The return journey is similarly affected. (Inserted timetable). These timings mean a round trip of 4 hours and 10 minutes (to Ilkley and back). All this time for 40 minutes to reach a care home, say “hello, how are you, OK, goodbye”. The taxi fare is in the region of £20 each way. Not all of us drive. I myself am 74, so the Pennine bus service was a lifeline and made it possible to live in this lovely part of Yorkshire. We all regret its passing. PLEASE re-think this service.

66 Carleton

I have spoken to NYC Customer Services today about service 12: Skipton to Carleton. They have confirmed that from September the school service in a morning and in an evening will not be available to anyone other than school children. This means that Carleton residents only have a service three times a day (edit: now six) reduced from the original Pennine service of 11 times per day and the recent NYC service of 5 times a day (because we could use the school service). From the new timetable it is noted that Embsay have a service 9 times per day (Service 14) and it would be most appreciated if you could explain why Embsay village has three times the amount of buses to Skipton than Carleton. Presumably you will have some data to support your explanation.

67 Carleton

: I note that the data supplied for the Pennine 580 service relates to Tuesday and Thursday travel only, these being the only days of the week when there is no Skipton market. Can you confirm that there was really no survey work done on a Skipton market day that is to say on a Monday, Wednesday, Friday or Saturday? Secondly the surveyors were observed by myself and others asking questions of individual passengers. These related to car ownership, frequency of travel etc. Is there no record of the answers to these questions? Surely this information can be conveyed without revealing individual identities?

68 Embsay

From Embsay Parish Council: (A woman 27 weeks pregnant and starting to have contractions. She was on the bus on her way to the hospital. The driver is

aware of this. She pulled the buzzer to get off the bus and started walking to the door.)

Driver: *to her* “You sit back down!” *to the rest of the bus* “Is anyone going to need any of the next four stops? Because if so, I suggest you get off now, as we are detouring!”

(The driver then takes us directly to the hospital. He stops the bus, gets out of his seat, walks me down the steps, and into the hospital! The next day I am still in the hospital. I call up the transit office). Woman: “Hi, yes. I was on bus [215 Burnley] yesterday evening and the driver detoured from his route for me. I just wanted to make sure he is not in trouble. Because of him, they were able to save the life of my unborn son!”

Transit employee: “No worries, miss. We only got one complaint from a passenger. The driver called us as soon as he got back with everyone on the bus. He has been given a commendation for his actions yesterday. Thank you for calling, and take care!”
